## **SAFETY REFERENCE MANUAL PURPOSE**

The purpose of the Six Flags Safety Reference Manual is to clearly communicate to every employee and contractor their responsibility for safety.

Realization of this goal will reflect a firm commitment to safety, exhibiting layers of competent safety training and safe work practices throughout Six Flags.

*It must be understood that this Safety Reference Manual in no way ensures every aspect of safety and health. The Safety Reference Manual can only be used as a tool to reasonably foresee hazards and aid in the planning and prevention of hazards encountered in the work place.*

When other safety concerns are presented, prudent safe work practices must be employed using federal, state and local safety guidelines as a minimum safety standard.

## **CERTIFICATION OF HAZARD ASSESSMENT**

I Marie Provost certify that the Safety Resource Manual for Six Flags New England is a clear evaluation of the hazards that may be present within the work place identified as Six Flags New England as of 01/06/2016.

Extensive employee training is performed to ensure that all employees whose job function may require them to face the particular hazards outlined in the Safety Resource Manual are safe, have the proper safety equipment, and know how to use their safety equipment.

Personal protection equipment is provided by Six Flags New England, by the employee, or by an outside contractor (if doing work on park property) and must meet all requirements specified by OSHA.
